**Note:**

In Greece, Italy, and Spain "consumption" includes fruit withdrawn from the market under the EU price support program. Split years refer to harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For Southern Hemisphere, harvest occurs almost entirely during the second year shown. For Gaza and South Africa, includes tangerine production. For the United States, includes temples.

**Note:**

Split years refer to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown. The harvest of lemons usually begins earlier and often extends throughout the year. Morocco, clementines only. For Japan, mainly satsumas (also called mandarin or unshu mikan but also including mandarin hybrids.) For the United States, includes tangelos, which account for about half of combined tangerine and tangelo production. Export and import data include mandarins.

Note: To convert grapefruit to 1-3/5 Bu. Boxes multiply by 25, 940.

**Note:**

In Greece, Italy and Spain "consumption" includes fruit withdrawn from the market under the EU Price support program. Split years refer to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown. The harvest of lemons usually begins earlier and often extends throughout the year. Morocco, clementines only. For Japan, mainly satsumas (also called mandarin or unshu mikan but also including mandarin hybrids.) For the United States, includes tangelos, which account for about half of combined tangerine and tangelo production. Export and import data include mandarins.
