Note:

In Greece, Italy, and Spain "consumption" includes fruit withdrawn from the market under the EU price support program. Split years refer to harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For Southern Hemisphere, harvest occurs almost entirely during the second year shown. For Gaza and South Africa, includes tangerine production. For the United States, includes temples.

Note:

Split years refer to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown. The harvest of lemons usually begins earlier and often extends throughout the year. Morocco, clementines only. For Japan, mainly satsumas (also called mandarin or unshu mikan but also including mandarin hybrids.) For the United States, includes tangelos, which account for about half of combined tangerine and tangelo production. Export and import data include mandarins.

Note: To convert grapefruit to 1-3/5 Bu. Boxes multiply by 25, 940.

Note:

In Greece, Italy and Spain "consumption" includes fruit withdrawn from the market under the EU Price support program. Split years refer to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown. The harvest of lemons usually begins earlier and often extends throughout the year. Morocco, clementines only. For Japan, mainly satsumas (also called mandarin or unshu mikan but also including mandarin hybrids.) For the United States, includes tangelos, which account for about half of combined tangerine and tangelo production. Export and import data include mandarins.

SOURCE: Economic Research Service, U.S. Department of Agriculture.

All noncitrus fruit data are on calendar-year basis, except for apples (year begins in August of the year shown), grapes (since 1990, year begins in May; prior to 1990, year begun in July), and pears (year begins in July). For oranges, Temples, tangerines, and tangelos, years begin in November, grapefruit in September, and lemons in August of the prior year. Lime year begins in April of the year shown. 2009 Season is Preliminary. 2/ Some figures may not add due to rounding.

ERS information was found on the website: <http://www.ers.usda.gov/Data/FoodConsumption/FoodAvailSpreadsheets.htm>.

48/56 Grapefruit Rule	22 Regulation Weeks Not Utilized in 2008-09 Season	Regulation & Percentages			

The minimum maturity standard for fresh grapefruit shipments placed in interstate and export commerce will be a 7.5 rati with an 8.0 brix for the entire season (August 1 through July 31) including the following sliding scale.

Brix	Ratio
8.0 to (not including) 9.1	7.50
9.1 to (not including) 9.2	7.45
9.2 to (not including) 9.3	7.40
9.3 to (not including) 9.4	7.35
9.4 to (not including) 9.5	7.30
9.5 to (not including) 9.6	7.25
9.6 and greater	7.20

The minimum ration could not go below 7.20 even if the brix goes higher than 9.6
